

HARI OM MISHRA

Java Developer | Spring Boot Microservices | React

mhariom794@gmail.com | [linkedin.com/in/hari-om-mishra](https://www.linkedin.com/in/hari-om-mishra) | github.com/mhariom2005

PROFESSIONAL SUMMARY

B.Tech Computer Science student and aspiring Java Developer with formal training in Core Java and Advanced Java (GrasTech) and hands-on experience building Spring Boot microservices, RESTful APIs, and React-based user interfaces backed by MySQL. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, and DBMS, with practice in unit testing, Git-based collaboration, and Agile development. Seeking a Developer role to develop, test, and ship high-quality Java, Microservices, and React applications.

TECHNICAL SKILLS

Programming Languages: Java, SQL, JavaScript, C, C++, Python

Backend & Microservices: Spring Boot, Microservices Architecture, RESTful APIs, Web Services, Spring MVC, Spring Data JPA, Hibernate, Spring Security, JWT, JDBC, Servlets, JSP

Frontend: React.js, Hooks, Component-Based Architecture, HTML, CSS, JavaScript (ES6), Fetch API

Databases: MySQL, DBMS, SQL Queries, Joins, Normalization, Indexing Basics

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Multithreading, Collections Framework, Exception Handling

Practices & Tools: Agile/Scrum, Unit Testing, Code Reviews, CI Basics, Git, GitHub, Maven, Postman, JUnit, Eclipse, IntelliJ IDEA, VS Code

PROFESSIONAL EXPERIENCE

Summer Training Program – Core Java & Advanced Java | GrasTech

- Completed intensive training in Core Java and Advanced Java covering OOP principles, collections framework, exception handling, and multithreading.
- Gained practical experience with JDBC, Servlets, and JSP to build database-driven, dynamic web applications.
- Built mini-projects applying inheritance, encapsulation, polymorphism, and abstraction; practiced debugging, code review, and clean, maintainable Java code.

Java & Spring Boot Developer | Project Experience

- Built web applications using Java, Spring Boot, and RESTful API design to implement backend business logic and microservices.
- Applied data structures and algorithms to improve performance; debugged and fixed issues, wrote JUnit tests, and followed code review practices.

Web, React & Python Developer | Project Experience

- Developed responsive web applications using React, HTML, CSS, and JavaScript with REST API integrations, plus Python-based solutions.
- Used Git and GitHub for version control; tracked and resolved bugs to improve application stability.

Entrepreneurship Trainee | Wadhvani Foundation

- Completed training in business strategy, organizational operations, and structured problem-solving methods.

Workshop Participant | Softpro Technology

- Participated in project-based software development training, building practical coding skills through hands-on exercises.

PROJECTS

Order & Inventory Microservices | Java, Spring Boot, REST APIs, MySQL, Maven, JUnit

- Split an order system into independent Order and Inventory services, each with its own database and REST interface.
- Connected services over REST to verify and update stock, with failure and timeout handling and unit-tested business logic.

Full-Stack E-Commerce Application | React, Java, Spring Boot, Spring Security, JWT, JPA, MySQL

- Built a React storefront (product listing, cart, checkout, order history) consuming secure Spring Boot REST APIs with JWT and role-based access.
- Ensured consistent stock and orders using @Transactional validation; added pagination, search, and JUnit tests.

Digital Wallet & Transaction System | Java, Spring Boot, JPA, Hibernate, MySQL

- Developed APIs for deposits, withdrawals, and peer-to-peer transfers with full transaction history.
- Prevented balance errors under concurrent transfers using ACID transactions and optimistic locking.

Task Manager Web App | React, JavaScript, REST API Integration, Git

- Built a responsive React app with add, edit, delete, and filter features using reusable components and hooks.
- Integrated REST APIs using the Fetch API to load and update task data; version-controlled with Git and GitHub.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science & Engineering

Dr. A.P.J. Abdul Kalam Technical University

2023 – 2027
